SUMMARY

BCA graduate skilled in SQL, DBMS, data modelling, and relational database design, with hands-on experience in Python, MySQL, PostgreSQL, and Django. Strong in data analysis, schema design, query optimization, problem-solving, and translating requirements into structured data solutions.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES6+), Python, SQL, PHP

Frontend: Bootstrap, HTML5, CSS3, Responsive web development

Backend: Django, Django REST Framework, REST API design, JWT authentication

Databases: MySQL, PostgreSQL (via Supabase), SQLite - schema design, indexing basics

DevOps & Testing: Docker, CI/CD pipelines (GitHub Actions), Postman, deployment on Vercel / Render / AWS EC2

Core CS: Data Structures & Algorithms, DBMS, Computer Networks, Git/GitHub workflows

PROJECTS EXPERIENCE

eDoc — Appointment Management Platform *PHP · HTML5 · CSS3 · MySQL · GitHub Actions*

Live: EDOC | Code: GitHub

- Built a role-based clinic booking system (Admin, Doctor, and Patient) enabling appointment booking, schedule management, patient records, and secure user authentication using PHP and MySQL.
- Designed a normalized MySQL schema (7 tables) with indexed lookups on doctor availability, improving appointment search performance and ensuring Optimized database queries.
- Deployed the application on InfinityFree and configured GitHub Actions for automated workflow execution while using GitHub for version control.

ShopKart — Django E-Commerce Application *Python · Django · DRF · Bootstrap · Docker*

Live: ShopKart | Code: GitHub

- Developed a full e-commerce app — catalog, cart, checkout, and order tracking — with full CRUD via Django ORM and a DRF API layer consumed by AJAX-driven frontend components.
- Improved product listing performance by implementing server-side pagination and optimizing Django ORM queries with `select_related` and `prefetch_related`, reducing page load time by approximately 35% under seeded test data.
- Implemented user authentication, product management, shopping cart, checkout, and order tracking features using Django and Bootstrap.

CropCast — Crop Yield Prediction API *Python · Flask · Pandas · scikit-learn · React*

Live: CropCast | Code: GitHub

- Trained a Linear Regression model on agricultural data using rainfall, soil, and historical crop yield features to predict crop yield and support Crop yield prediction for agricultural planning.
- Exposed predictions through a Flask REST API with input validation and served results in a React dashboard with charted visualizations.

EDUCATION

Bachelor of Computer Applications (BCA) 2023 – 2026 (Expected: July 2026)

Asansol Engineering College, Asansol, WB — CGPA: 7.14/10

ACHIEVEMENTS & CERTIFICATIONS

- Two-time Finalist — Smart India Hackathon (Intra-College Rounds, 2024 & 2025); Co-Organizer, SIH 2024 Intra-College Round.
- Oracle Certified Java Foundations Associate (2025); AWS Academy Cloud Foundations.
- Earned Reverse Engineering certifications from TryHackMe (2023, 2024).
- Coordinator, Robotics Club, Asansol Engineering College — Led a 14-member core team, organized 50+ technical events and workshops, and contributed to the club's growth to over 500 members, including facilitating Google Cloud Arcade workshops.
